Output signals

2-wire: 4 ... 20 mA (pressure)

2-wire: 4 ... 20 mA (temperature)

Special characteristics

- ▶ diameter 26,5 mm
- ▶ separate output signals for pressure and temperature ranges
- ▶ good long term stability
- ▶ easy handling
- ▶ low maintenance and wiring costs

Optional versions

- ▶ different kinds of cables
- ▶ different kinds of seal materials
- ▶ customer specific versions

BD|SENSORS has developed the stainless steel submersible probe LMK 307T with flush mounted ceramic sensor for continuous level and temperature measurement in water or waste water applications.

The advantage: simultaneous recording of level and temperature with separate independent signal amplification. The maintenance and wiring costs are considerably reduced.

In addition to classical signal processing of the level, an additional signal circuit independent of the level which converts the temperature signal into a 4 ... 20 mA analogue signal in 2-wire technology is provided.

Preferred areas of use are

Water

e.g. drinking water system, RÜBs
ground water monitoring
storm water systems

Sewage

waste water treatment, water recycling,
dumpsite, waste water tanks

Fuel / Oil

fuel storage
tank farm, biogas plants
